

## BY SHAPE EMS

As always By Lebron adapting to the latest trends and collaborating in the growth of EMS, this time in the aesthetic sector and in a concrete way.

We present our aesthetic model By Shape, a trousers with a built-in girdle so that it only works on the lower body (it also includes abdomen and arms) and for the client to do it in a passive way and locating in specific areas of the female body.

With this we expand the possibilities of our EMS equipment and with it, the portfolio of possible clients who do not like sports but want to take care of their figure. With just a new pants, your business will have more possibilities to expand customers and improve profitability.

**Ask us how! We will be happy to inform you!**

And remember, By Lebron we are compatible with the main EMS firms in the market and we are 100% Spanish manufacturing.
